Faster Fiber Management Solutions

Do your fiber optics need rounding up? Sharp corners may be fun on the racetrack, but they can wreak havoc on your fiber optic cables, causing lost data and reduced efficiency.

Fast-Drop Fiber Bend Radius Control Modules provide the BICSI recommended minimum bend radius for fiber optic cables, assuring consistent data transmission. The Fast-Drop is molded of UL94 V-0 flame retardant, impact resistant polycarbonate and is rigid enough to withstand large bundle loads. NEBS compliant.

The universal Fast-Drop quickly snaps on to any panel edge up to 0.104" (2.7mm), retained by a RoHS compliant plated steel slip. It also may be screw or tab mounted to the cabinet to make service loops.

Cables are easily contained with the use of our hook and loop strap. Available from stock in three containment widths: 1" (2.5cm), 1.75" (4.4cm), and 3" (7.6cm), in black or beige.

Slotted side design allows for easy screw and/or stacking attachment
